Sun Safety Essay 2010 – Coral Gables Elementary, Coral Gables, Florida

I moved here a few years ago from England and there I never put on sunscreen, because, there, the sun never shone. So, when I arrived, I got burnt by the sun straight away. I soon realized that it wasn't just a sun burn; I had just damaged my skin. The sun can be very harmful, but there are ways to protect yourself. Our school having a sun hut could make children aware of the sun's danger.

Sun safety is very important because the sun can cause damage. It is very bad for you if you are not taking precautions. You might be thinking a tan is good. A burn can be a little painful but at least it goes away. You may also be thinking, my parents tanned with oil and they came out scar free. But did you know that you can get skin cancer from the sun, and skin cancer can kill you? Also, your parents did not come out scar free. If they were not careful in the sun they came out with sunspots and they are lucky that that is all. Back then, they did not know that the sun was bad for you, but now people know. Also, now with all the pollution, the ozone layer has holes. The ozone blocked out some of the harmful rays but with the holes, the harmful rays get in. Now, the sun is even more dangerous and you must be even safer.

If you do simple things like putting sunscreen on before you go out in the sun, and refreshing it after time you can be safe. If you are aware and stay in the shade when the sun is out, then you will be fine. But many children aren't aware of this and a sun hut can help. Firstly, it could make children aware of the sun and its danger and encourage them to either wear sunscreen or watch out in the sun. Also, the kindergartners always play, learn and do art outside.

The sun hut could make it safe for them to be outside and not get a sun burn. It would also encourage others that are not kindergartners to go outside and work.

As you can see, the sun is very dangerous. Even though it seems harmless, it can be a very bad thing. It can really hurt you. You must do things like put on sunscreen or stay in the shade while the sun is high, because a peaceful day at the park or a football game could be a harmful thing. As long as you are aware and safe in the sun then it is fine. A sun hut would help us become aware.
